

LEARNING MANAGEMENT SYSTEM

TEMPUS

Site Online Learning provides an easy to use Learning Management System (LMS) labelled Tempus that enables you to build, import, assemble, deliver and track training content in one convenient system.

With Tempus you don't have to worry about hosting, technical support, maintenance and configuration of your platform. We take care of all user support and technical needs while you focus on more important aspects of your business.

Create.

Tempus is the ideal cloud based Learning Management System to launch your online training from. It allows you to import existing eLearning courses, upload custom courses and create engaging training programs for your organisation.

We provide tailored design features specific to your company to ensure colour schemes, logos and overall user experience are in-line with your branding.

Share.

Learners can collaborate and share various multimedia formats for trainers to view and grade. Tempus allows you to deliver content to multiple groups, with each group having their own portal to view and manage training.

Additionally Tempus can connect with existing systems in your business, whether it be a CRM or Human Resource platform, we can provide centralised access to your eLearning data and training reports.

Learn better, achieve more.

Deliver.

Deliver consistent, high quality training across your organisation with Tempus and ensure your employees have the right skills when they need them.

Connecting your company through training.

- Cloud hosted
- Access anywhere, at anytime
- Browser based platform
- All you need is an internet connection
- No additional software or hardware required
- 24/7 system monitoring
- Support team of system experts

Track.

Access real-time training information at your fingertips with Tempus.

User-friendly Dashboards.

Our intuitive interface allows you to monitor, track and report on training delivered across your organisation. Tempus allows you to generate custom reports to analyse training progress, historical completions, and user profiles.

Custom Roles & Permissions.

Define custom roles, set system permissions, and establish individual user access levels to create a streamlined learning platform for organised learning, feedback and assessment.
